Liquid IPL

I am pleased to announce a new treatment we are adding to our DermaCare repertoire. It is called the Liquid IPL treatment. It is a series of 4 treatments scheduled every other week. Approximately 3 to 4 days after the first treatment you will see a tightening, a lifting and a plumping of your face and neck. All of our clients who have had the treatment say they looked 10 years younger.

Toward the end of the first week this younger look will fade. After the second treatment your youthful appearance will last the full 2 weeks. After the third treatment you will see an even younger effect. By the fourth treatment most of our clients have said they look 15 to 20 years younger.

After the 4 treatments your new more youthful appearance should last 6 months to a year depending on your age and lifestyle.

In Beverly Hills they are charging between \$500 and \$600 per each treatment. Here at DermaCare we are offering our Liquid IPL Treatment for \$160 apiece. This is a phenomenal introductory price. We are doing this because I want all our clients to be able to take advantage of this great treatment.

The liquid IPL activates the body's repair systems. Even with aged skin these repair systems are fully operable. Any repair system requires a large input of energy. Biologically this is in the form of adenosine triphosphate (ATP). This energy source is generated by a natural cycle called the Citric Acid Cycle or Krebs Cycle. Once we cause the Krebs Cycle to spin we can generate higher quantities of ATP, the energy molecule; which in turn generates pyruvate and citric acid which produces large quantities of collagen and elastin. Collagen and elastin is the infrastructure of our skin. It is what creates the firmness and tone. Or in other words, the more collagen and elastin in the underlying tissues, the younger we look.

Whenever I add any treatment to our menu, it has to meet certain requirements. It has to do what it says it will do and it has to do it naturally. I don't believe in invasive procedures and toxic drugs. Everything that we do at DermaCare meets these standards, otherwise we wouldn't do it.
